MAKING TRACKS

ONE of the best ways to tell a person's fortune is to study his footprints. Some people start for fortune's goal, wander off into every byway and never arrive. Others plod along get discouraged and turn back to the starting point. But you've noticed that the people who are their own landlords and bosses are the ones who, at about your age, learned to make tracks to the Bank in the quickest possible time after receiving their pay.

| South Paris PHONE 39-2 "Cover mouth and nose when you cough or sneeze. If you don't, you'll spread disease." If everyone would take this precaution, there would be fewer epidemics of Influenza. Colds whether taking the form of Influenza with sneezing, running nose and a rough feeling throat, or with chilly and feverish symptoms, should never be neglected in the earliest stages, if you hope to avoid a disagreeable diperience. Don't eat too heartily; drink plenty of water; get to bed early in a well-ventilated room; have your body well-warmed, and be sure to have your bowels move freely. At the beginning of a cold, there is no better or safer remedy than the true "L.F." Atwood's Medicine. Two to four teaspoonfuls will quickly relieve congested bowel conditions, drive out impurities from the system, and help to ward off further troubles. Always have a bottle in the house. "ALL FOR ONE, ONE FOR ALL"

In this production "Doug" has achieved the ambition of his life—and registers with it, what is by all odds the great, outstanding success of his career. His is a remarkable, clear-cut portrayal of the noble novel of Mediaeval Franco.

This tremendous film is the happy culmination of a desire of years on Fairbanks' part to enact what is conceded to be the most striking and heroic figure in the entire history of literature.

very own to arrange as she pleases, if the family can possibly spare the space Girls instinctively love what is beautiful and try to express themselves in their surroundings. With a little thought and some real work the girl herself can transform an uninteresting, uninviting room into a place of tranquillity and charm—a sort of sanctuary to which she can escape when she wants to think hings out alone, as girls often do. The girls in the "Own Your Own Room" clubs, under the direction of the United States Department of Agriculture and various state agricultural col-leges, have accomplished wonderful results in making over unattractive rooms according to the suggestions given them by club leaders and home economics

The first step is naturally the improveent of the appearance of the empty shell of the room. A neutral shade for the walls, floor, and larger articles in the room is usually pleasing. Cushions, table covers, books, and other small, bright colored objects give the needed touch of color. Chintz or cretonne in curtains and cushions sometimes suggests the color to be emphasized. This is more informal and homelike than an attempt to have everything match. No matter what color scheme is chosen, the darkest tones are best for the floor and Your closest inspection of the

CHOOSING A BED.

The bed is the most important plece of furniture in the room. About one-third of every 24 hours is spent on it. For health and comfort a good bed is important, especially a good mattress and spring. A simple, painted metal single bed is desirable for a young girl. A slip-on cover of unbleached muslin is excellent for keeping the mattress clean. Sleeping without a pillow is often recommended, but the bed needs at least one pillow to make it look complete, and this, like the mattress, should be protected by a thin, close-fitting, washable tected by a thin, close-fitting, washable cover between the ticking and the pillow case. The sheets, blankets, and com-fortables should be chosen with care. An improvised dressing table can be nade by hanging a mirror over a small able. This is to be preferred to dresscollect dust. A bureau or chest of drawers is needed for storing clothing and personal belongings. Bureau and table covers should be as simple as possible and always fresh and clean. If there is room for only one chair it should be a table are attractive touches. If there is no closet, some sort of wardrobe is need ed to hang clothing. A good wastebasket, one that will not tip over easily for shed dirt, should be provided. Many girls make their own.
Shades and curtains should be choses snades and curtains should be chosen to regulate but not shut out the light and air. Simple, durable, softly hanging material such as white or cream voile, scrim, Swiss, or cheesecloth, hemmed or hemstitched, make good washable curtains which may have overcurtains which may have over-curtains of colored or figured material.

The lighting is important. For light-ing the bureau or dressing table an elec-tric light on a drop cord or an inverted Welsbach gas burner gives a better light if suspended over it, but if kerosene is the only source of light available a bracket lamp fastened to the wall at one side of the bureau gives the best lighting. For reading, a table lamp is most satisfactory. One or two well chosen pictures, simply framed, add to the room, but useless ornaments only in-
